

Reassessment request (Physics)

Name: _____

Today's Date _____

Teacher: Mr. McChesney

Class Blocks: _____

Each week you may reassess one standard. For content standards, remember that your grade is determined by averaging your best score and most recent score (two unique assessments). For habits of mind, lab skills and scientific reasoning standards, your grade is determined by averaging all your scores and your most recent score. Therefore, even one reassessment can make a big difference.

Retake Policy

1. The retake score will override the original score for the standard that is retested.
2. Student may only retake one standard each week.
3. Student earns retake privilege only if all guidelines have been met that are checked below.
4. The retake test will **not** be identical to the original. Studying mistakes from the original test is advised, but while the new assessment will be over the same standard, it may be of different length and in a different format.
5. Students must make arrangements to retake the test at least. Retakes will be offered on Tuesday or Friday mornings at 7:15 AM, during E & I, Tuesday/Thursday after school at 3:00 PM (pending teacher availability), or arranged at another time during the day pending availability of the teacher and student.

Evidence of Preparation - Teacher approved plan

Teacher will check the requirements for this reassessment and will initial once completed. All requirements must be completed before the reassessment date for a student to be eligible.

 X Submit this form and schedule a time to reassess/submit your reassessment within two days (48 hours) of getting back the original assessment.

 Conferences with teacher during class or E&I

 Participate in review sessions during E/I with teacher

 Arrange time before or after school with the teacher for assistance

 Attend time with teacher until work leading up to the assessment is completed

 Complete an additional assignment related to the assessment, described below in teacher notes

 Complete original assessment corrections with an explanation of why original answers were wrong Write a paragraph explanation of why you want to reassess, what was learned during the revision process and have this signed by a parent/guardians
